

QuikApps is online meal application processing that takes the hassle out of applying for free or reduced meal status. QuikApps maintains compliance with federal and USDA regulations to make free and reduced meal applications simple. The system is powerful, flexible, and provides an efficient way to process single- or multi-family meal applications. It enables applications to be entered from the central district office, individual school sites, or by parents online.

## Key Capabilities:

### Powerful

- Browser-based, meaning that it's effectively hosted within your district
- Developed using Microsoft SQL Server, giving the solution a strong backbone and infrastructure
- Uses any word-processing application for its letters, providing a clear and flexible pathway for any need

### Flexible

- Centralized application processing is enabled, which greatly reduces the number of people necessary for involvement in the application process
- You can add an unlimited number of users
- Capable of scanning free and reduced applications

### Detailed Reporting

- Detailed reports readily available whenever you or your staff need them
- Reports are accessible from the same website as QuikApps and other PaySchools modules

## Advantages for your District:

### Easy to Use

- Centralized automated step-by-step application processing
- Automatic determination of benefits
- Ability to scan in free and reduced paper applications
- Online step-by-step parent application
- Automated verification sample size and application selection

### Accuracy

- Automatically integrates with QuikLunch, providing all necessary payment information for students
- Quick and easy direct certification uploads, edits, and extending benefits to defined families
- Meal status integration with Student Information System for other department use
- Track appeals, log verification events, view verification statistics

### Increase Productivity

- Flag verify for cause prior to verification sample selection
- Immediate status determination and communication once the application is completed
- Online applications are digitally signed, automating the meal status request process
- Requesting state and federal benefits reporting requirements
