

# > the technology behind every ticket.

As a trusted K-12 partner since 1998, PaySchools understands that schools are vibrant communities that hold lots of events.

And the staff and volunteers running those events have lots of complex tasks to manage.

That's why PaySchools created PaySchools Events as part of our K-12 software suite.

PaySchools Events simplifies your events by managing ticketing, registration, payments, and much more.

PaySchools Events can easily be used by every school in your district and is perfect for:

---

AP exams registration

---

Athletic events

---

Concerts

---

Dances

---

Fundraisers

---

Graduation

---

Homecoming

---

Merchandise sales

---

Parking passes

---

Preschool and/or kindergarten registration

---

Prom

---

Season passes

---

Summer school or camps

---

And more!

# Let PaySchools Events Simplify Your Events!

## Easy event page set-up

With PaySchools Events, it's fast and simple to create and publish unique webpages for every event that display all the info your families and volunteers need:

- dates and times
- locations (with map links)
- instructions (such as parking or what to bring)
- registration forms, if needed
- ticket or fee payment portal
- seat selection
- and more!

## Collect payments online and in-person

PaySchools Events solves all your payments headaches.

Families can pay through the event webpage's payment portal OR in person—in your front office or box office, or at the event itself. The software records and tracks cash, check, and credit-card payments—whatever forms you choose to accept. Or use the system to go cash-free!

## Ticketing that makes everyone happy

Ticket and registration structures can be complicated, but PaySchools Events makes the selling simple.

Seat selection? Tiered pricing? Discounts and promotions? Season passes? Restricted tickets or volume-capped sales? No problem. Purchasers receive QR-code tickets they can print out or present on their phones. And your team will use the provided software tools to scan tickets at your entry point!

## All the info—in one place

PaySchools Events' administrative interface houses all the information you need. Create reports. Keep an eye on ticket sales. Manage special offers. Reconcile revenue. Email confirmations and reminders.

## Personalized support, at your service

Every PaySchools Events school is assigned to a support team member who is available to help them set up and manage events.

That's a rarity in today's apps and big-software world, but it's how we at PaySchools still do things. Person-to-person. One event at a time.

## Affordable, risk-free pricing

PaySchools Events is standalone, cloud-based software your schools can license with no long-term commitment.

You'll be amazed how many events your schools will be able to manage with PaySchools Events. And manage simply! So your staff and volunteers can spend their time on more important things.
