

## Together PaySchools and Health-e Pro bring it all to the table.

PaySchools and Health-e Pro bring best-in-class nutrition software services together to provide the ultimate cafeteria solution.

For food service directors who want the best for their program, our solutions save time and money, present well, and aid compliance—all with the data and systems that play well together.

It's the impressively nutritious, delicious full-meal deal you've been searching for.

# Your Best-in-Class Nutrition Services Software Solution

Simply plug PaySchools' K-12 cafeteria software modules and hardware together with Health e-Pro's innovative, user-friendly menu-planning and nutritional analysis software, and voilà—your front-of-house and back-of-house will share information seamlessly.

- Menu planning, cycle menus, production records, one-screen compliance, and online publishing are all integrated into one easy-to-use package.
- Prepared and needed items are pulled from inventory. Suggested food supplies reorder POs are generated. The system tracks on-hand, committed, and on-order inventory, for an accurate, real-time snapshot.
- Menu-price adjustments or ingredients changes are suggested based on inventory pricing changes.

To talk to a representative or schedule a customized demo, please call PaySchools at **855.210.8232, opt. 4** or Health-e Pro at **800.838.4856, ext. 1**.
